Education

| | |
|--|---------------|
| Vellore Institute of Technology, Bhopal | May 2026 |
| Bachelor of Technology in Computer Science and Engineering | CGPA: 8.34/10 |

Technical Skills

Programming Languages: Java, JavaScript, Python, C++, HTML, CSS

Libraries & Frameworks: React.js, Node.js, Express.js, Tailwind CSS, Bootstrap

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, VS Code, Postman, JWT, REST APIs

Projects

| | |
|---|-------------------|
| Nagarsaathi – Civic Complaint Management System | GitHub Apr 2025 |
|---|-------------------|

Tech Stack: React.js, Node.js, Express.js, MongoDB, Google OAuth, JWT

- Developed a full-stack MERN application for ward-wise civic complaint registration with real-time status tracking, administrative dashboard, and admin analytics panel for complaint resolution monitoring
- Engineered secure authentication using Google OAuth 2.0 and JWT-based session management with role-based access control for citizens and administrators
- Implemented QR code-based mobile complaint submission, reducing average filing time by 70% and enhancing accessibility for non-technical users

| | |
|--------------------------------------|-------------------|
| Tunetrail – Music Streaming Platform | GitHub Nov 2024 |
|--------------------------------------|-------------------|

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a full-stack music streaming platform with 1,000+ song library, featuring playlist management, queue control, and real-time audio streaming capabilities
- Designed responsive UI with React.js and Tailwind CSS, ensuring cross-platform compatibility and optimal user experience on desktop and mobile devices
- Developed RESTful API architecture for user authentication, playlist CRUD operations, and efficient audio file streaming with Express.js

| | |
|---|--------------------|
| Signet – Reusable Authentication Module | GitHub Sept 2024 |
|---|--------------------|

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, bcrypt.js, Nodemailer

- Created a modular MERN stack authentication system with complete user lifecycle management including registration, login, and session handling
- Implemented JWT-based stateless authentication and bcrypt password hashing for secure credential storage
- Integrated automated email verification via OTP validation and password reset functionality using Nodemailer

Certifications

| | |
|---|----------|
| Full Stack Developer MERN SmartBridge | Apr 2025 |
|---|----------|

| | |
|----------------------------|-----------|
| Java (Basics) HackerRank | July 2025 |
|----------------------------|-----------|

| | |
|---|----------|
| Data Structures and Algorithms in Java Apna College | Aug 2025 |
|---|----------|

Achievements

| | |
|------------------------------|-----------------------|
| Coding Platform Achievements | GeeksForGeeks Profile |
|------------------------------|-----------------------|

- Achieved an institute rank of 457 by solving 400+ problems in Java on GFG, with a coding score of 1190.
- Consistently solved 200+ problems on GeeksForGeeks & LeetCode as a part of 100 Days of Code challenge.

Extracurricular Activities

| | |
|--|---------------------|
| Core Member, Design Team – AMS Student Chapter, VIT Bhopal | Apr 2024 – Aug 2024 |
|--|---------------------|

- Collaborated with a team of 5 designers to create 20+ graphic assets, strengthening the club's brand identity and visual presence
- Contributed to almost 50% growth in social media engagement and event participation through consistent, high-quality design deliverables
